Salt Water Fuel Cell Engine Car KIT

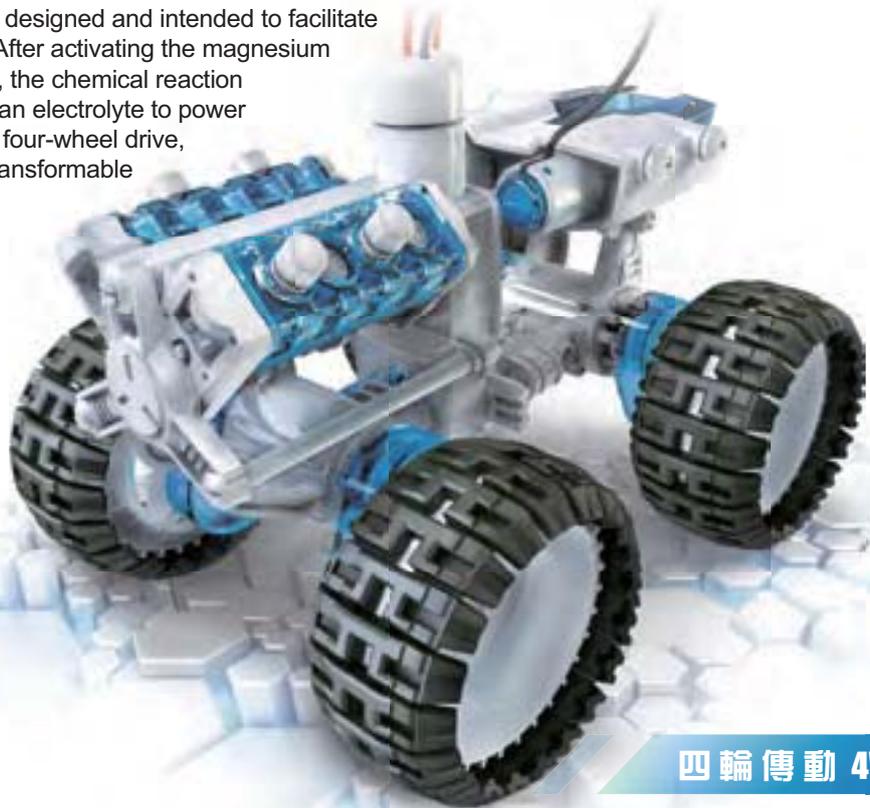

鹽水動力引擎車

Item No : GE-752

V8汽缸、4輪傳動、登山越野!! V8 engine, 4WD cruiser

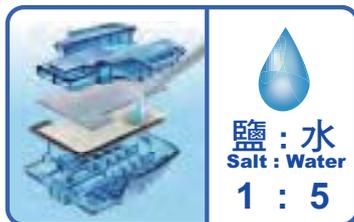

這是一款安全無毒、對環境友善、乾淨的金屬燃料電池車，其原理是使用鎂合金片與鹽水混合，進行化學反應後，分解出的電子產生電流進而驅動引擎車翻山越嶺。引擎車採V8汽缸，可調整為水平引擎或V型引擎，更以4輪傳動設計征服顛坡路面，車體會隨地形而扭動變化，有力的攀爬前行。這是很棒的體驗，雙手動起來，擁有樂趣，學習加倍。

The Salt Water Fuel Cell Baja Runner is designed and intended to facilitate transport via salt water fuel technology. After activating the magnesium fuel cell module with a saltwater mixture, the chemical reaction generates electricity using salt water as an electrolyte to power the on-board motor. Fully-equipped with four-wheel drive, adjustable height, pivoting body and a transformable engine shape, the vehicle can tackle any surface it encounters.

「鹽+水→燃料電池」 Salt + Water → Fuel Cell

燃料電池模組 Fuel Cell Module

四輪傳動 4WD

不需電池 No Battery

綠能環保 Environmentally Safe

引擎模式 Engine Mode		車體高度 Vehicle Height		4 輪傳動 4 Wheel Drive
V型引擎 V engine	水平引擎 Flat engine	可自由調整 Adjustable height		車體腰部可隨地形變化扭曲 Easily handle different types of terrain by its twisted car body design.

鹽水動力燃料電池包含鎂合金片、不織布與空氣極，可讓車子行駛4個小時，每滴一次鹽水可跑15分鐘，每件組套附有3片鎂合金片供做替換。

Salt water fuel cell kit contains a nonwoven fabric, a magnesium sheet and an air cathode. The magnesium metal sheet can operate the vehicle for about 3-4 hours continuously and watered/time allows the vehicle to run 15mins.
